

### **Feeding stingrays in the Abaco Islands, the Bahamas**

A number of tours available in the Abaco Islands chain incorporate stingray feeding into visitors' island experience. For example, **Brendal's Dive Center in Green Turtle Cay** takes you on a snorkeling expedition that ends on the deserted Manjack Cay for a picnic. On the tour, the staff snatches up scraps of the raw grouper for you to stuff between your toes in the shallow water to draw the silky and sleek stingrays to glide over your feet. But a word of caution: Make sure your toes remain flat on the sand bottom.
